The distinct attraction of SONOR ACRYLIC DRUM SETS is not only the optical effect, but also the special dry sound that is favored by Rock and Pop Groups. The see through effect that accentuates the activity of the drummer is further dramatized and highlighted through the use of transparent Remo heads. Sonor acrylic shells are made firm thick for extra strength and are heat resisting up to 100°C. They are welded with a double V through a special process. SONOR ACRYLIC DRUM SETS come in Smoky, Blue, Red and Clear.
